## Advanced Fiber Amplifier Units

－Features a Power Tuning function that optimizes light reception at the press of a button．
－APC circuits to suppress LED aging degradation used with 4－ element LEDs．
－2－channel models achieve the thinnest＊profile in the industry，at only 5 mm per channel．
－2－channel models also offer AND／OR control output．
－The E3X－MDA0 with two channels supports an EtherCAT Sensor Communications Unit or CompoNet Sensor Communications Unit．
＊（Based on July 2012 OMRON investigation．）

Note：As of the end of March 2017，orders of the E3X－DA $\square$ SE－S／ DA $\square$－S／DA $\square A T-S / D A \square R M-S / D A \square T W$－S are no longer accepted．
As of the end of March 2019，orders of the E3X－DA $\square$ AN－S／ DAH $\square$－S／DAB $\square$－S／DAG $\square$－S are no longer accepted．

For the most recent information on models that have been certified for safety standards，refer to your OMRON website．

## Features

## Models available for a wide variety of applications at manufacturing sites

## Industry Leading Two Amplifiers Loaded in a Small Body …2－channel models

Two amplifiers are loaded in a 10 mm －wide body． Space usability can be approximately doubled． In addition，approximately $40 \%$ of the energy can be saved．
（compared to the value per channel of the former model）

High－speed and High－resolution Analog Output Supports Wide Variety of Applications $\cdots$ ．Advanced Analog

## Analog Control Output

The voltage in the range of 1 to 5 V is output according to the incident level（digital display）．Wide variety of applications is possible including positioning control or difference detection with multiple levels．

High－speed and High Resolution
Detection modes can be switched in accordance with applications． High－speed response of $80 \mu \mathrm{~s}$（super－high－speed mode）supports the positioning controls that require high－speed control．

## Ordering Information

## Fiber Amplifier Units

Amplifier Units with Cables (2 m) [Refer to Dimensions on page 17.]

| Item |  | Appearance | Functions | Model |  |

## Accessories (Order Separately)

Amplifier Unit Connectors (Required for models for Wire-saving Connectors.)
Note: Protector seals are provided as accessories. [Refer to Dimensions on page 19.]

| Item | Appearance | Cable <br> length | No. of con- <br> ductors | Model |
| :---: | :---: | :---: | :---: | :--- |
| Master Connector |  | 2 m | 3 | E3X-CN11 |
|  |  |  | 4 | E3X-CN21 |
|  |  |  | 1 | E3X-CN12 |
|  |  |  | 2 | E3X-CN22 |

## Ordering Precaution for Amplifier Units with Wire-saving Connectors

Amplifier Units and Connectors are sold separately. Refer to the following tables when placing an order.

## When Using 5 Amplifier Units

| Fiber Amplifier Units (5 Units) |
| :---: |
| 1 Master Connector + 4 Slave Connectors |

Mobile Console [Refer to Dimensions on page 20.]

| Appearance | Model | Remarks |
| :--- | :--- | :--- |
|  | E3X-MC11-SV2 | Mobile Console with Head, <br> Cable, and AC adapter pro- <br> vided as accessories <br> (model number of set) |

Note: Use the E3X-MC11-SV2 Mobile Console for the E3X-DA-S/MDA-series Fiber Amplifier Units.
The E3X-MC11-SV2 is an upgraded version of the E3X-MC11-S that is fully interchangeable with the older model.
Mounting Bracket [Refer to E39-L/E39-S/E39-R.]

| Appearance | Model | Quantity |
| :---: | :---: | :---: |
|  | E39-L143 | 1 |

End Plate [Refer to PFP- $\square$.

## Fiber Amplifier Units

- Single-function, Standard, and Mark-detecting Amplifier Units

Note: The ON/OFF regions when areas settings are used with the E3X-DA $\square$ TW-S are as follows:
LIGHT ON: ON when the incident level is between the thresholds for channels 1 and 2 .
DARK ON: OFF when the incident level is between the thresholds for channels 1 and 2 .

Nomenclature
Fiber Amplifier Units

E3X-DA $\square$ TW-S
E3X-DA $\square A T-S$
E3X-MDA $\square$

## Safety Precautions

## Refer to Warranty and Limitations of Liability.

## WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly.
Do not use it for such purposes.

## Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

## Fiber Amplifier Unit

## - Designing

Operation after Turning Power ON
The Sensor is ready to detect 200 ms after the power supply is turned ON. If the Sensor and load are connected to separate power supplies, be sure to turn ON the Sensor first.

## - Mounting

Connecting and Disconnecting Wire-saving Connectors

## Mounting Connectors

1. Insert the Master or Slave Connector into the Amplifier Unit until it clicks into place.

2. Attach the protector seals (provided as accessories) to the sides of master and slave connectors that are not connected.

Note: Attach the seals to the sides with grooves.

## Removing Connectors

1. Slide the slave Amplifier Unit(s) for which the Connector is to be removed away from the rest of the group.
2. After the Amplifier Unit(s) has been separated, press down on the lever on the Connector and remove it. (Do not attempt to remove Connectors without separating them from other Amplifier Units first.)

Adding and Removing Fiber Amplifier Units

## Adding Fiber Amplifier Units

1. Mount the Amplifier Units one at a time onto the DIN track

2. Slide the Amplifier Units together, line up the clips, and press the Amplifier Units together until they click into place.

Removing Fiber Amplifier Units
Slide Amplifier Units away from each other, and remove from the DIN track one at a time. (Do not attempt to remove Amplifier Units from the DIN track without separating them first.)

Note: 1 . The specifications for ambient temperature will vary according to the number of Amplifier Units used together. For details, refer to Ratings and Specifications.
2. Always turn OFF the power supply before joining or separating Amplifier Units.

## Mounting the End Plate (PFP-M)

An End Plate should be used if there is a possibility of the Amplifier Unit moving, e.g., due to vibration. If a Mobile Console is going to be mounted, connect the End Plate in the direction shown in the following diagram.

Mounting the Mobile Console Head
Leave a gap of at least 20 mm between the nearest Amplifier Unit and the Mobile Console head.

## Fiber Unit Connection

The E3X Amplifier Unit has a lock button for easy connection of the Fiber Unit. Connect or disconnect the fiber units using the following procedures:

## 1. Connection

Open the protective cover, insert the fiber units according to the fiber unit insertion marks on the side of the Amplifier Unit, and lower the lock lever.

Note: If one of the fibers from the Fiber Unit is labeled as the Emitter fiber, such as with a Coaxial Sensor, insert that fiber into the Emitter section. Refer to Dimensions for the Fiber Unit to see if there is an Emitter fiber label.

## Fiber Units with E39-F9 Attachment

Fiber Units That Cannot Be Free-Cut (with Sleeves)

2. Disconnecting Fiber Units

Remove the protective cover and raise the lock lever to pull out the fiber units.

Note: 1. To maintain the fiber unit properties, confirm that the lock is released before removing the fiber units.
2. Be sure to lock or unlock the lock button within an ambient temperature range between $-10^{\circ} \mathrm{C}$ and $40^{\circ} \mathrm{C}$.

- Adjusting

## Mutual Interference Protection Function

There may be some instability in the digital display values due to light from other sensors. If this occurs, decrease the sensitivity (i.e., decrease the power or increase the threshold) to perform stable detection.

## EEPROM Writing Error

If the data is not written to the EEPROM correctly due to a power failure or static-electric noise, initialize the settings with the keys on the Amplifier Unit. ERR/EEP will flash on the display when a writing error has occurred.

## Optical Communications

Several Amplifier Units can be slid together and used in groups. Do not, however, slide the Amplifier Units or attempt to remove any of the Amplifier Units during operation.

## - Others

## Protective Cover

Always keep the protective cover in place when using the Amplifier Unit.

## Mobile Console

Use the E3X-MC11-SV2 Mobile Console for the E3X-DA-S-series Amplifier Units.

## Fiber Amplifier Units

Amplifier Units with Wire-saving Connectors
E3X-DA6-S

E3X-DA6AT-S
E3X-DA8AT-S E3X-MDA6 E3X-MDA8

Mounting Holes

Note: When using E39-L143 Mounting Brackets, there will be small gaps between the Fiber Amplifier Units if they are mounted side by side.

Amplifier Unit with Connector for Sensor Communications Unit E3X-MDAO

## Amplifier Unit Connectors

Master Connectors

* E3X-CN12: 2.6 dia. cable / 1 conductor / Standard length: 2 m (Conductor cross section: $0.2 \mathrm{~mm}^{2}$ (AWG24), Insulator diameter: 1.1 mm ) E3X-CN22: 4 dia. cable / 2 conductors / Standard length: 2 m (Conductor cross section: $0.2 \mathrm{~mm}^{2}$ (AWG24), Insulator diameter: 1.1 mm )

Mobile Console

Refer to E32 Series for details on Fiber Units.

Read and understand this catalog.
Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

## Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE
PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.
Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.
See http://www.omron.com/global/ or contact your Omron representative for published information.
Limitation on Liability; Etc.
OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.
Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

## Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.
NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.
Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

## Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

## Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.
Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
